DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petriekis (6,609,636) in view of Cho (5,100,033).

Petriekis discloses, in fig. 4, a flexible bag in a bag in box packaging system comprising a front and rear pair sheets having left and right vertical marginal edges secured by sealing to form a downwardly inclined and converging seal lines 52, 54 to form a conical shaped lower end of the sealed bag; and a dispensing fitment 48.

Petriekis does not disclose the dispensing fitment having a horizontal dispensing spout; wherein the flow of fluid from the spout vertically downwardly away from the spout,

Cho teaches, in figs. 4 and 5, a flexible bag in a bag in box packaging system comprising a dispensing fitment having a horizontal dispensing spout; wherein the flow of fluid from the spout vertically downwardly away from the spout.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the bag in the Petriekis invention with

Art Unit: 3754

a dispensing spout, as taught by Cho, in order to dispense the fluid from the flexible bag.

In regard to method claims 5-8, the flexible bag in a bag in box packaging system of Petriekis in view of Cho is capable of performing the steps as claimed.
